EMERALD ASH BORER TREATMENT OPTIONS

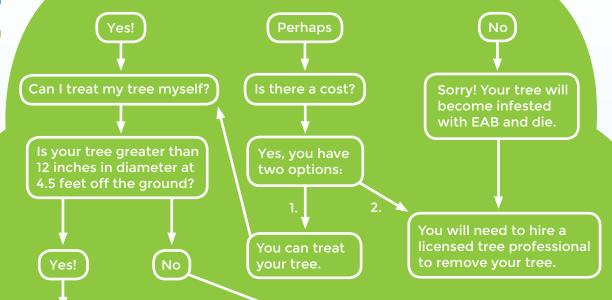

1 IN 6 TREES IN DENVER IS AN ASH TREE

DO YOU HAVE AN ASH?

Simple ways to identify ash trees:

- Opposite branching
- Compound leaves
- Diamond-pattern bark

DO YOU WANT TO SAVE YOUR ASH?

Contact a licensed tree professional and ask about treatment options: trunk injection, soil drench, or sprays. Visit BeASmartAsh.org for more information.

You can purchase a pesticide, but we recommend you hire a licensed tree professional.

If you have room for a new tree in the public right-of-way next to your property, you may be eligible to have a free tree planted for you. Visit **BeASmartAsh.org** for more information.
